

Recycle Twine Here

Clean baling twine is being collected as a community service and fundraiser for local youth groups. This twine will be processed into pellets which are then used to manufacture new plastic products.

Thank you for recycling your baling twine. Please note the following:

No trash.

Please remove all veterinarian needles, horseshoes, and other foreign objects.

No hay, cornstalks, or dirt.

Twine that is too dirty cannot be recycled.

No net twine or other agricultural plastics.

We are only able to recycle plastic baling twine.

No sisal or jute twine.

Sisal and jute are biodegradable and do not need to be recycled.

This recycling program is managed by Community Twine Recycling Inc.
